

Find Your Wig Size

How to Find Your Correct Wig Size:

First, measure your head with a length of string or cloth tape measure according to steps 1 - 3. Then refer to the WigShop.com Wig Size Chart below for wig measurements. Generally speaking, most will wear size Average. Before beginning, flatten your hair and be sure not to stretch or pull tape measure.

1. Measure around head

Start at your natural hairline in front. Measure around the back to the bend in your neck, above your other ear, then around front to starting point.

2. Measure front to back

Measure from your natural hairline in front, back over the crown to where your head meets the top of your neck.

3. Measure ear to ear

Starting in front of one ear where your hairline ends, bring your tape measure up and over the crown to the front of your other ear.

Wig Size Chart:

Wig Sizes	Around the Head	Front to Back	Ear to Ear
Mini-Petite (MP)	20 3/4"	12 3/4"	12 3/4"
Petite (P)	21"	13 1/4"	13"
Average (A)	21 1/2"	14 1/4"	13 1/2"
Large (L)	23"	15 1/4"	14"
Extra Large (L)	23 3/4"	16 1/4"	14 1/2"

Stylist Tip:

If all three measurements do not match up exactly with one size on the chart, select the wig size that corresponds to the largest measurement. Velcro® tabs inside each wig adjust the circumference up to 1" larger or smaller to ensure a secure fit.
